

THE LONGEST STANDARD WARRANTY IN THE BUSINESS

Arrow includes a 30-day limited warranty on our other pre-owned trucks, which is good. But an Arrow Certified truck comes with a **SIX-MONTH/50,000 MILE LIMITED WARRANTY** – from National Truck Protection, no less.

And don't worry; we didn't cut corners on the coverage. It's the same outstanding coverage that we sell for our non-certified vehicles. But with an Arrow Certified truck, it's included. And it's the longest warranty of its kind in the business.*

Plus, if you want to upgrade to a one- or two-year warranty, we'll credit you with the cost of the six-month warranty, so you can save money while you protect your investment even longer.

INVEST IN THE BEST

Why settle for less? Invest in an Arrow Certified truck. Nothing else even comes close.

ARROW

CERTIFIED™

Ask your Arrow Truck Sales representative for details on the certification program or for a list of Arrow Certified Trucks.

Certified Truck Program

Nobody backs them up like we do.

THE BEST OF THE BEST

Arrow Truck Sales has always offered the best pre-owned trucks around. Now, with an Arrow Certified™ pre-owned truck, we've taken the best and made them even better. Every one of these trucks is covered by the industry's longest standard warranty: a six-month/50,000 mile limited warranty on the engine, transmission and rear axle. Who else does that?

You can choose from a wide variety of makes and models, not just one or two like some other dealers offer. But only the best of Arrow's over 2,000 vehicles even

qualify to be Arrow Certified. Then, Arrow Certified trucks undergo an extensive inspection and reconditioning process. So for the best used truck investment in the industry, get an Arrow Certified truck today.

NOT EVERY TRUCK QUALIFIES

At Arrow, we start with newer, lower mileage trucks. Only trucks less than five model years old, with under 550,000 miles, are eligible to be Arrow Certified. So you can be sure that we're starting with a good truck. But we don't stop there.

IT'S ALL IN THE DETAILS

Our rigorous inspection and reconditioning process covers several details that our competitors don't. In fact, we ensure the quality of 29 different interior features, along with 39 mechanical checks, 26 exterior features, and six undercarriage components.

MECHANICAL

Test drive truck
Change oil and filters
Pressure test cooling system
DOT passable
And 35 more components!

EXTERIOR

Inspect cab condition
Ensure matching tire sizes and tread design
Ensure tread depth 12/32 or better
Paint frame and hubs black
Complete truck degrease
Wash and polish exterior of truck
And 19 more checks!

INTERIOR

Verify operation of gauges and switches
Inspect interior upholstery
Replace mattress (sleepers)
Clean carpets
And 25 more items!

UNDERCARRIAGE

Inspect for transmission, differential leaks
Inspect suspension
Inspect for oil and fuel leaks
And 3 more checks!
